Leading Specialist Weapons Systems & Ordnance Expertise

K39C is an Australian owned Defence consultancy, veteran-owned and mission-driven to strengthen sovereign capability through deep technical expertise and proven delivery across complex Defence programs in Australia and UK.

With integrity, precision and excellence at our core, our team to navigate the evolving demands of modern warfare to reduce risk, accelerate sovereign capability, strengthen domestic supply chains, building operational resilience.

With a focus on protecting national interests, enhancing operational readiness and delivering optimised outcomes across the Guided Weapons and Explosive Ordnance (GWEO) Enterprise and wider Defence landscape, K39C are your trusted capability partner, supporting both the Australian Department of Defence and the UK Ministry of Defence.

With offices in Australia and the UK, our specialists comprise of both Australian and British citizens, providing unique opportunities for our clients. Their collective expertise in munitions, guided weapons and explosive ordnance, delivering critical programs, forms the backbone of K39C while providing continuity of full lifecycle capability including:

- Manufacturing and industrialisation
- Introduction into service
- Sustainment
- Disposal

We have the team, capability and expertise to align to each nations' strategic defence priorities (Australian Defence Strategic Review and the UK Defence and Security Industrial Strategy), and by doing so, we deliver integrated, sovereign expertise to both nation's Defence forces and industry partners, advancing shared security objectives through collaboration, innovation and technical excellence.

WHAT WE DO

GUIDED WEAPONS EXPERTISE

We are the experts in product testing, evaluation, qualification, certification and platform integration of guided and non-guided weapons systems, with a focus on safe and functional munitions.

EXPLOSIVE ORDNANCE EXPERTISE

We deliver safe, reliable, full-cycle solutions for explosive ordnance manufacturing including design assessment to disposal, while maintaining required standards.

PROJECT & PROGRAM MANAGEMENT

We deliver complex Defence projects with precision – always on time, on budget and to the highest standard.

SUPPLY SUPPORT

We provide expertise in ammunition technical advisory, encompassing commodity engineering and a full spectrum of logistics operations. This ensures seamless supply chain management for Defence and industry.

DEFENCE PROCUREMENT

With extensive ASDEFCON and Defence procurement knowledge, we provide strategic guidance to navigate procurement and tender challenges. We develop and implement contract management frameworks for effective outcomes.

INTEGRATED LOGISTICS SUPPORT

We are experts in optimising the readiness and sustainment of Defence systems through effective maintenance, supply chain management and training, enhancing and ensuring overall ADF operational effectiveness.

DEFENCE MANUFACTURING

We understand systems engineering, commercial and contract advisory, finance and forensic cost analysis within the Defence manufacturing environment. Our expertise drives efficient, cost-effective industrial capability and capacity outcomes.

EXPERT PROFILE

MARTI NEETHLING

**K39C Senior Principal Consultant & GWEO Systems
Division Electro-Explosive Hazards (EEH) Desk Officer**

Marti Neethling is a leading subject matter expert for EEH within the GWEO Enterprise. With a career dedicated to advancing safety, interoperability and capability, his contribution to this specialist field is significant and enduring.

His work has been instrumental in enabling the Australian Defence Force (ADF) to undertake critical munitions assessment that support faster, evidence-based decision making while reducing operational risk.

Marti was awarded **Engineer of the Year** at the Australian Defence Industry Awards in 2020, recognition of his exceptional technical expertise and contribution to advancing Defence capability.

In 2024, his white paper, “**Strategies for Ensuring Effective Interoperability with Electrically Initiated Explosive Ordnance Exposed to Dynamic Electromagnetic Environments**”, was well received at Parari, Australia’s premier explosive ordnance safety symposium, where K39C was a major partner.

Respected for his professionalism, rigor and considered approach, Marti is an invaluable member of the K39C team and is a reflection of the excellence K39C represents.
